ADAPTIIV

PATIENT DISCUSSION GUIDE

Questions to Ask Your Doctor

About Dupuytren's Disease & Radiation Therapy

Use these questions to discuss Dupuytren's disease, treatment options, and next steps with your radiation oncologist.

Understanding Your Condition

- What stage is my Dupuytren's disease at, and how might it progress?
- What symptoms should I monitor?

Exploring Treatment Considerations

- What are the potential benefits, risks, and limitations?
- What are the potential short- and long-term side effects of radiation therapy?

Asking About Radiation Therapy

- How will you ensure the radiation dose is delivered accurately across the curves of my hand?
- Could a patient-specific 3D-printed bolus be used in my treatment?

Planning Next Steps

- Am I a suitable candidate for radiation therapy?
- What would the treatment process and timeline look like?
- What follow-up care or monitoring would be needed?
